DETAILED ACTION

Response to After-Final Amendment and Appeal Brief

This office action is in response to the after-final amendment filed on May 5, 2008 and the appeal brief filed on August 8, 2008.

Applicant's arguments, see pages 6-9 of the after-final amendment and pages 5-9 of Appeal Brief with respect to the rejections of the claims under Ohmi, Henley and Aspar have been fully considered and are persuasive. Therefore, the previous rejections under Ohmi, Henley and Aspar have been withdrawn.

Accordingly, claims 1, 9 and 19 were amended and claim 12 was canceled. Claims 2, 3 and 5-7 were previously canceled.

Currently, claims 1, 4, 8-11 and 13-22 remain active.

Allowable Subject Matter

Claims 1, 4, 8-11 and 13-22 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record, taken alone or in combination, fairly shows or suggests all the limitations as claimed.

Re claim 1, none of the prior art of record discloses the following limitations in combination with the rest of the limitations in the claim: initiating detachment of the layer from the remainder portion at the super- weakened region by applying a controlled detachment force obtained by heating at least the weakened zone wherein the heat is applied substantially evenly over substantially the entire weakened zone, and wherein the heating is controlled for evening the heating applied to weakened zone such that the detachment initiates and propagates from the super-weakened region through the main region to detach the layer from the remainder portion;

Art Unit: 2822

and wherein the detachment force is applied to both the super-weakened region and the main region.

Re claim 9, none of the prior art of record discloses the following limitations in combination with the rest of the limitations in the claim: initiating detachment of the layer from the remainder portion at the super- weakened region to impart a controlled detachment force obtained by applying heat substantially evenly over substantially the entire weakened zone, and wherein the heating is controlled for evening the heating applied to the weakened zone such that the detachment initiates and propagates from the super-weakened region through the main region to detach the layer from the remainder portion, wherein the heat is applied by heating elements that are independently controlled for evening the application of heat to the weakened zone; and wherein the detachment force is applied to both the super-weakened region and the main region.

Re claim 19, none of the prior art of record discloses the following limitations in combination with the rest of the limitations in the claim: initiating detachment of the layer from the remainder portion at the super- weakened region by applying heat a controlled detachment force obtained by heating at least the weakened zone wherein the heat is applied substantially evenly over substantially the entire weakened zone, and wherein the heating is controlled for evening the heating applied to the weakened zone such that the detachment initiates and propagates from the super-weakened region through the main region to detach the layer from the remainder portion, wherein the detachment force is applied to both the super-weakened region and the main region to obtain a detached layer that is substantially homogenous and has a low surface roughness and improved homogeneity compared to the surface roughness and

Art Unit: 2822

homogeneity obtained from a conventional detachment annealing on a wafer having a weakened zone but not a super-weakened region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
